Supplemental DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach the limitations of claims 9 and 33, particularly: "a first type restricting function to one target data element that is restricted from repeating in the target dataset by the relationships of the target schema and to any number of source data elements that are restricted from repeating in the source dataset by the relationships of the source schema; a second type restricting the function to one instance of a group comprising multiple data elements that are restricted to repeat as a group by the relationships of the target schema and to any number of source data elements that are restricted from repeating in the source dataset by the relationships of the source schema; and a third type restricting the function to a first number of instances of a group comprising multiple data elements that are restricted to repeat as a group by the relationships of the target schema, a second number of instances of a group comprising multiple data elements that are restricted to repeat as a group by the relationships of the source schema, and any number of source data elements that are restricted from repeating in the source dataset by the relationships of the source

schema, the first and second numbers being equal." is not found in the prior art of record.

Dependent claims 2, 4-7, 34-38 incorporate the listed limitations by reference and contain limitations that further distinguish over the art of record. For these reasons, claims 2, 4-7, 34-38, are considered allowable over the art of record.

Conclusion

The allowance dated 5/19/06 fails to include the independent claim 33 in the statement of the reasons for allowance. Thus, Examiner hereby sends out a supplemental allowance.
